

The Pole Position 750

Pole Position 750 is designed for Ski School instructors and trainers to give their students a genuine Aha! and a greater experience of skiing. The 750 is made for small turns to medium quick.

Pole Position is the first product in a series of alpine training tools from Pole Position Sports AB to become endorsed by the Austrian Ski Federation. Ski schools in Austria, Sweden and the Netherlands are already incorporating Pole Position in their programs.

The product optimizes in-motion balance by means of your upper-body coil (torque) and arm position. Resulting in enhanced posture and dramatically improved balance leads to a more natural way of skiing.

The Pole Position Performance Technology

Model:	Pole Position 750
Length:	750 mm 29,5"
Adjustable Max:	750 mm 29,5"
Adjustable Min:	550 mm 21,5"
